MARKETS & EXPERTISES

Chromatotec® provides a full range of automated continuous and online analyzers using gas chromatography coupled with innovative detectors for ppt/ppb/ppm and % quantification levels:

- VOC quantification with "airmo" products line (GC-FID, GC-PID, GC-MS, GC-TCD),
- Gas or air Impurities detection with "chroma" solutions (GC-FPD, GC-wet cell),
- Sulfur in air, natural gas or biogas monitoring with "medor" product line (GC-wet cell).

Chromatotec® provides turnkey solutions for gas process.

In addition to analyzers, Chromatotec provides all-in-one solution including sampling device as multiplexer, internal calibration for data validation, gas generators, cabinets.

Chromatotec's analyzers have gained specific certifications relating to the relevant standards by worldwide recognized tests (mCERTs, GOST, ASTM D7493-08).

Monitoring Applications:

- Ambient Air Monitoring indoor & outdoor (ppm or ppb)
- Odor Monitoring
- Emissions & Continuous Emissions Monitoring (CEM's)
- Pure Gases Manufacturer / Testing
- Natural Gases / LPG Monitoring
- Process Monitoring
- Water Surveillance

ON-LINE GC/MS FOR VOC MONITORING

airmoTWA / airmoSCAN_{XPERT}

It is a combination of two robust instruments, **airmo-VOC expert GC analyzer** and **Mass Spectrometry (QMS)**, which allows quantification and identification of chemicals from % to low ppt levels.

The complementarity of the instruments allows the monitoring of low concentrations in 30 minutes at ppm / ppb / ppt levels. **airmoTWA** is delivered with gas generators, calibration system (in compliance with **ISO 17025** for Benzene) and multiplexer.
