Re : Equivalence certification for automatic instrumentation about the benzene measure according to the Ministerial Decree 60 dated 2 April 2002

DECLARATION

- Seeing the Ministerial Decree 60 dated 02/04/2002 that includes the directive 69/2000 relative to the limit values of the ambient air quality for the benzene and the carbon monoxide.
- Seeing what is expressed in the attached document IX, paragraph 2 of the decree mentioned below that assigns the responsibility of the equivalence certification for the instrumentation of the benzene measure to the Primary Laboratory of Reference, that is to say the Institute for Atmospheric Pollution.
- Seeing the request from Airmotec ag SA dated 6th June 2006 for obtaining the equivalence certification for the analyser BTXairToxic 5U
- Seeing the technical note enclosed which forms the integral part of the current certification made by Dr. Rosanna Mabilia

It is declared

- The BTXTAirToxic 5 U analyser is equivalent to the reference method as long as the reported prescriptions in the technical note are met.
- The certification will be valid if the instrument is used in the configuration proposed for its certification.
- The delivered certification has a three-year validity as from today. At the end of this period, the manufacturer should ask for a confirmation of the certification according to the terms indicated in the successive period.

The Director
(Dott. Ivo ALLEGRI)
